

CROSS X-PAND by Cotesi

RELIABILITY
ENDURANCE
PERFORMANCE

Disruptive

Double weft construction protected by an international patent application.

Advantages

- More protection for the crops: greater resistance on the bale;
- Cross X-Pand by Cotesi withstand more pressure due to the double weft construction;
- Benefit in the handling process and reduced loss in transportation: protected and plasticized bale.
- Uniform bale with smooth surface.

Applications:
Silage, Hay, Straw
